

CASE STUDY

PROJECT DETAILS

Project Name:

Harwood Senior Living

Location:

Wauwatosa, WI

Owner:

Harwood Senior Living

General Contractor:

Hanging Gardens

Product Manufacturer:

County Materials
Corporation

Date:

2020

Key Products:

Skylands™ Concrete Deck
Pavers, Summit Stone®
Landscape Units, Crest™
Bullnose Pavers

Concrete Landscape Products Transform Senior Living Outdoor Patio

Solutions: Concrete landscape units provide safe and functional outdoor living space

Harwood Senior Living facility offers top-of-the-line services and amenities. When building an outdoor living area for residents, quality materials were selected to create a long-lasting patio with a spectacular design.

County Materials' Skylands™ Concrete Deck Pavers were chosen for their enhanced safety capabilities and design potential. Skylands pavers in Reunion and Vision accent the courtyard's gazebo and its surrounding walkways. The pavers were shotblasted to enhance surface friction for pedestrians without sacrificing their gentle appearance.

Skylands Concrete Deck Pavers offer level placement and adequate water drainage with the use of a pedestal system. The evenly spaced joints collect rainwater to prevent puddling and potential safety hazards.

Summit Stone® Landscape Units in Haven were used to create flower beds throughout the outdoor space. Crest™ Bullnose Pavers offered a finishing touch and were utilized as caps on top of the structure. Complementing the concrete pavers, the Summit Stone Units provide a dimensional aesthetic to the patio.

Continued on page 2.

Concrete landscape products are reliable and manufactured to last. Their inherent durability provides resistance to the elements and freeze/thaw cycles throughout the harsh winter months and reduces maintenance costs throughout the products' extended service life.

County Materials' local and readily available concrete landscape products were essential in meeting the project's tight deadline. Within three months, more than 3,500 SF of concrete deck pavers were installed to create an outdoor living space that exceeds expectations. The residents of Harwood Place were pleased with the project's timely completion, as it allowed them to welcome the incoming spring weather in their new courtyard.
